social media & meta ADS

Marketing

Case study: Spice Garden Restaurant

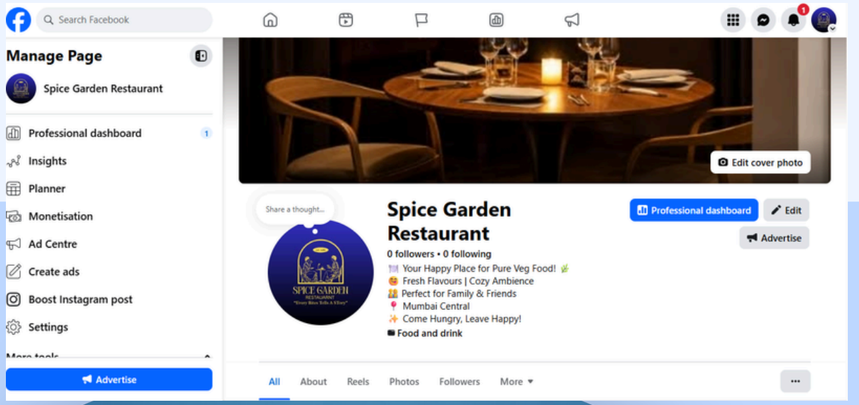
Present by Sakshi jain

Agenda

1. Organic strategy
2. Content strategy
3. Engagement & content calendar
4. Conversion tracking & UTM setup
5. Paid social media (Meta Ads)
6. Campaign types
7. A/B testing
8. Commerce Manager

Social Media Marketing & Meta Ads

Organic Strategy



What is it? Growing your audience for free, without paying for ads.

Key points:

- Optimize your profile: logo, bio, address, phone number, order link
- Post regularly on Instagram, Facebook and WhatsApp Status
- Use local hashtags (#KhopoliFood, #SpiceGardenFoodie)
- Use Google Maps and social media together for local discovery

Spice Garden example: The Instagram bio says "Authentic North Indian & Chinese | Dine-in | Delivery | Order below 👇" with a WhatsApp order link.

Social Media Marketing & Meta Ads

Social Media Marketing & Meta Ads

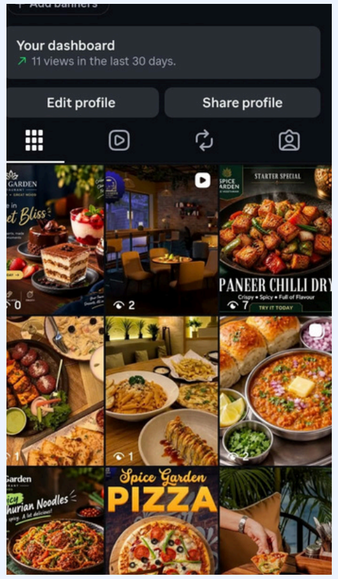
Content Strategy

Core idea: Decide what to post and why.

Content pillars (the 4 types of content):

Pillar	Spice Garden example
Educate	How our butter chicken is made
Entertain	Chef reels, food challenges
Inspire	Mouth-watering food photos
Promote	Weekend thali offer, festival menu

Rule of thumb: 80% value content (educate, entertain, inspire), 20% promotion.



Content Formats

- **Reels:** best reach (chef cooking, sizzling dishes)
- **Stories:** daily updates, polls, "Today's Special"
- **Carousels:** menu highlights, top 5 dishes
- **Posts/Photos:** quality food photography
- **User-generated content:** customers' photos, reposted with tags

Engagement & Content Calendar

Engagement means: likes, comments, shares, saves, DMs.

How to increase it:

Reply to every comment and DM within 1-2 hours

Ask questions ("Paneer or chicken? Comment below!")

Run polls and contests

Repost customer tags

Sample weekly calendar for Spice Garden:

Day	Content
Mon	Behind the scenes in the kitchen
Tue	Customer review
Wed	Reel: Chef's special
Thu	Poll: Next week's dish?
Fri	Weekend offer announcement
Sat	Live dining atmosphere
Sun	Family thali carousel

Social Media Marketing & Meta Ads

Conversion Tracking & UTM Setup

UTM example:
spicegarden.com/order?utm_source=instagram&utm_medium=paid&utm_campaign=weekend_thali

- **utm_source** = where (Instagram)
- **utm_medium** = how (paid, organic)
- **utm_campaign** = which campaign (weekend_thali)

Why track? To know which post or ad actually brought orders, not just likes.

Tools:

- Meta Pixel: a small code on the website that records visits, add-to-cart and purchases
- Conversions API: sends data directly from the server, more reliable
- UTM parameters: tags added to links to show where traffic came from

Paid Social Media (Meta Ads) Basics

Why paid? Organic reach is limited; ads reach the right people quickly.

Structure of Meta Ads (3 levels):

Campaign: the objective (what you want)

Ad Set: audience, budget, schedule, placement

Ad: the creative (image/video, text, button)

Targeting for Spice Garden: age 18-45, within 5-10 km, interests in food, dining and biryani.

Campaign Objectives (Part 1): Awareness, Traffic, Engagement

Objective	Goal	Spice Garden example
Awareness	Reach as many local people as possible	"New restaurant in town" video ad
Traffic	Send people to a website or menu page	Link to the online menu
Engagement	Get likes, comments, shares, messages	"Vote for your favorite dish" post

Social Media Marketing & Meta Ads

Campaign Objectives (Part 2): Leads & Sales

Objective	Goal	Spice Garden example
Lead Generation	Collect contact details	Form for birthday party or event bookings
Sales	Get purchases/orders	"Order online, get 10% off" ad

Social Media Marketing & Meta Ads

A/B Testing

What is it? Running two versions of an ad to see which performs better.

Rule: Change only one thing at a time.

What can we test?

- Creative: photo vs video
- Headline: "20% Off" vs "Free Dessert"
- Audience: age 18-30 vs 30-45
- Button: "Order Now" vs "Learn More"

Spice Garden example: Ad A shows a biryani photo, Ad B shows a chef's reel. Run both for 5-7 days with the same budget, then keep the one with lower cost per order.

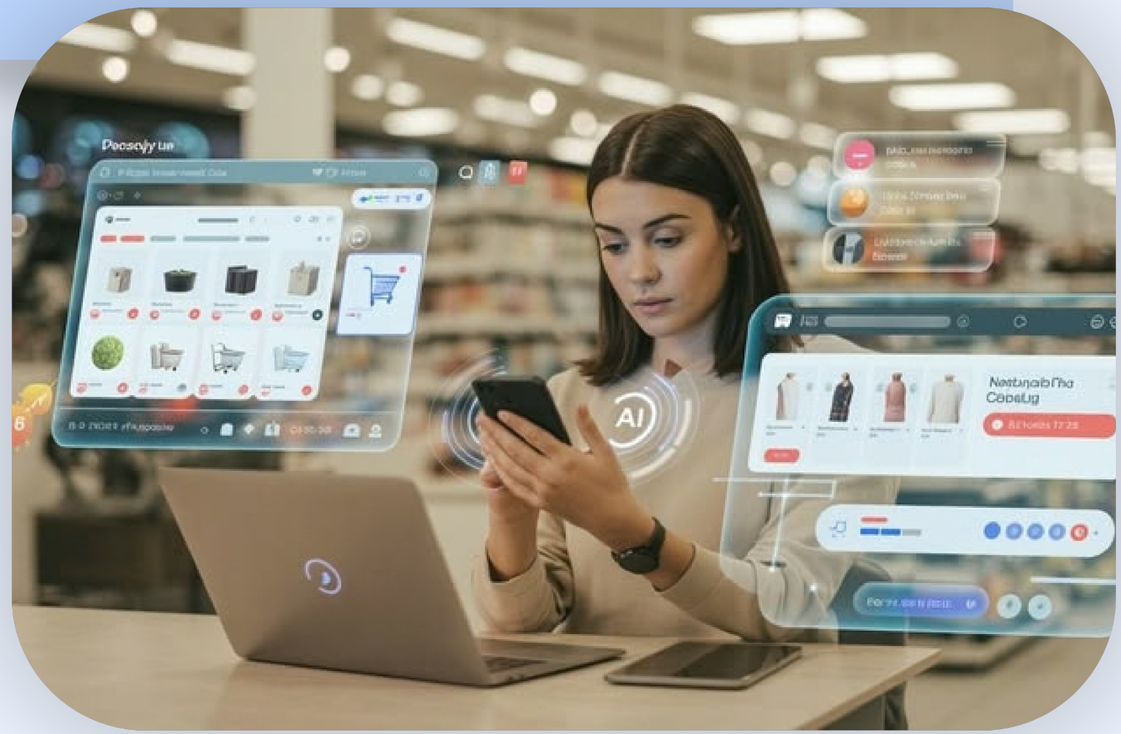
Commerce Manager

What is it? A Meta tool to manage your product catalog and sell directly on Facebook and Instagram.

What you can do:

- Upload your menu items as a catalog (name, price, photo)
- Create a Shop on Instagram and Facebook
- Tag products in posts, Reels and Stories
- Use catalog-based ads (Dynamic Ads) that show the right dish to the right person
- Track orders and inventory

Spice Garden example: Catalog items like "Chicken Biryani ₹250" and "Veg Thali ₹180" are tagged in a reel, and viewers can tap to order.



Thank you
Questions?

- Organic builds trust and community (free, slow)
- Content strategy + calendar keep you consistent
- UTM + Pixel show what really works
- Paid ads give fast, targeted results, so choose the right objective
- A/B testing improves results continuously
- Commerce Manager lets customers buy directly
